Grundig s350 field radio

AM/FM/Shortwave Radio. With its rugged body and military-style controls, the S350 Deluxe is ready for any challenge you throw its way. The large, full-range speaker gives you crisp, clear sound, wherever you are. The external antenna output allows for excellent AM, FM, and shortwave reception, and the separate bass and treble knobs put you in control. Whether you're out in the field, or just out in the backyard, you'll enjoy listening to the best that radio has to offer. What's in the box: Grundig S350 Delux AM/FM shortwave Radio, 90-Days Labor & 1-Year Parts Limited Warranty. Some reviews of Grundig S350DL Deluxe AM/FM/Shortwave Field Radio, Black - (NGS350DLB) - AM (530-1710 KHz), FM (88-108 MHz) and shortwave - continuous coverage from 3 to 28 MHz. Highly sensitive and selective analog tuner circuitry with AM/SW Frequency Lock, Rotary volume control and Variable RF Gain control. Inputs for supplementary AM/FM and shortwave antennas. This includes 13 international-broadcast bands (11, 13, 15, 16, 19, 22, 25, 31, 41, 49, 60, 75 and 90 meters). Manufacturers, suppliers and others provide what you see here, and we have not verified it. Eton Grundig S350 AM/FM/Shortwave Field Radio with Alarm Clock, Variable RF Gain Control, Full-Range Speaker, Bass and Treble Controllers, NGS350DLB, Black (New Open Box) New open box item. Comes in original retail packaging. Box may show wear. Talk about easy listening. The Grundig Etón S350 shortwave radio is brimming with style, portability, and functionality. With the S350, you aren't limited to shortwave signals--you get FM and AM radio, too. Shortwave enables you to hear stations from around the world. Get first-hand news and other programs direct from their sources. Listen to the BBC, CDC, Voice of America, DW Deutsche Welle, Radio Taipei International, and dozens of other broadcasting organizations. The S350 receives continuous coverage from 3 to 28 MHz, including 13 international broadcast bands: 11, 13, 15, 16, 19, 22, 25, 31, 41, 49, 60, 75 and 90 meters. Use the S350's manual gain control to compensate for atmospheric and other conditions. With its excellent sensitivity and selectivity, the S350 can receive stations most radios can't, including weak daytime shortwave signals. Other features include a backlit multifunction LCD, a telescoping FM antenna, antenna jacks for SW, AM, and FM, as well as sleep and wake timers (wake to radio and use the S350 as an alarm clock). The radio features a single speaker designed for clear sound. A .125-inch headphone jack (compatible with stereo or monaural headphones, not included) lets you listen in private, or you can route the unit's stereo analog (left/right) RCA outputs to your home stereo system, a tape deck, powered speakers, or other devices. AM (530-1710 KHz), FM (88-108 MHz) and shortwave - continuous coverage from 3 to 28 MHz. Highly sensitive and selective analog tuner circuitry with AM/SW Frequency Lock, Rotary volume control and Variable RF Gain control. Inputs for supplementary AM/FM and shortwave antennas. This includes 13 international-broadcast bands. Brand: Manufacturer Color: Customer Q&A Get specific details about this product from customers who own it. See more details at Online Price Match. webapp branch The S350DL may look like a digital radio, but it's actually analog inside and tuning is prone to drift. Many thanks to SWling Post contributor, Ed, who noted my comments about the Grundig S350DL's tuning drift yesterday, and shared the following fix found on Jeff McMahon's Herculdodge blog. Ed writes: The Grundig S350DL's mechanical tuning drift problem is reportedly easily correctable with a screwdriver: (Source: The Herculdodge) [...] The drift on AM was terrible! After 10 minutes, it is jumping all over the place -- if you touch the radio, the sound mutes and the display goes nuts. I pack it up to take it back but then I decide to google the problem and find this: I do exactly what he says -- I pull off the cover after unscrewing all of the screws (including the 2 in the battery compartment). Only the speaker is attached to the front. I remove the three screws from the display and then tighten the two screws on the tuning wheels. They were barely loose -- almost not noticeable -- so I was not too optimistic. I carefully got it all back together (the plastic pieces that hold the fabric handle on only go back on one certain way and were sort of a pain!). I cross my fingers, plug it in, and wow -- a brand new radio. The tuning is perfect. Zero drift on FM and AM. AM sounds excellent. [...] I have an earlier Grundig S350 that I bought at a hamfest years ago which had an easily-fixed power problem. For \$20 it makes a nice bathroom radio and it sounds great, especially on FM. BTW, I found schematics for it on radiomuseum.org, which is a great resource for radio schematics. Thanks for the tip, Ed! I think I'll crack open my S350DL later today and give this a try! The Eton Field BT Many thanks to SWling Post contributor, Chris Freitas, who notes that's he's published a favorable review of the Eton Field BT on his blog: Chris Freitas on Radio The Field BT shares the same basic chassis as the Tecsun S-8800 (check out the review published yesterday) and several other receivers including the Grundig S350DL, S450DLX, and the C.Crane CCRadio-SW. Chris and I both agree that one benefit to this type of large portable is the excellent audio fidelity they can provide. Read Chris' full review here. Not all large portables are created equally. The S350DL may look like a digital radio, but it's actually analog inside and tuning is prone to drift. Important clarification: The Field BT--just like the S-8800 and S450DLX--does not have the flaky analog tuning of the discontinued Grundig S350DL series. Since I started publishing videos of the Tecsun S-8800 in action, I've received feedback indicating that many assume the S-8800 will drift off frequency like the 2008 era GS350DL. It's true that both radios share a common form factor, but that's where the similarities end. The S350DL is actually an analog single conversion receiver with a digital frequency display. The S350DL tuning knob has an inner ring for fine tuning and an outer ring for speedy tuning. The big disadvantage of the S350DL is that it drifts off frequency every time the wind blows. At least, that's how it seems. It's a little frustrating, and that's why mine pretty much stays tuned to one station on my kitchen shelf. Even then, it manages to drift off frequency every few days. The Eton Field BT, Eton Field, Grundig S450DLX, C. Crane CCRadio-SW and Tecsun S-8800, on the other hand, all have a pure digital tuning experience with no drift at all. Most of these are at least double conversion and the S-8800 is even triple conversion. Chris, thanks again for sharing your review of the Field BT! It sounds like a major improvement over its predecessor, the S450DLX. I understand you're also evaluating the excellent Grundig Traveller III--we look forward to that review when published! The new S450DLX promises to be a capable shortwave and mediumwave radio. Universal Radio has announced that they are taking orders for the new Grundig S450DLX--an obvious replacement/improvement on the Eton/Grundig S350DL. I have used an S350DL extensively and find that its audio is exceptional. It is a very capable short and medium-wave receiver. Based on Universal's description, it appears the S450DL has many improvements including: An AM IF Output jack (F type) which could be used to decode DRM or SSB (similar to C. Crane Radio SW) 50 Memory Presets (10 per band) Dual-conversion superheterodyne circuit design Uses 6 D cell batteries (guess this new radio needs more juice!) The S450DLX could be a great radio and may even give my favorite large portable--the C. Crane Radio SW--a run for its money. Universal Radio says that they expect to have the S450DLX in stock 30 December 2010. (Updated 12 Dec 2010)
